History of Everyday Life in Scotland, 1800 to 1900

Greense Morton 2018-03-31 This volume explores the experience of everyday life in Scotland over two centuries c. 1800-1900. The authors show how the extraordinary changes imposed on the ordinary by the Industrial Revolution, the impact of the Great Famine and the spread of the railway were very different in individual areas of Scotland. They also discuss how urban, rural and commercial developments heightened the differences in experience, and how politics, social culture, and art and architecture. As B. Gregory put it, everyday history is "an endeavour that seeks to identify and integrate everything - all relevant material, social, political, and cultural data - that permits the fullest possible reconstruction of ordinary life experiences in all their varied complex, as they are formed and transformed."

Police Courts in Nineteenth-Century Scotland, Volume 1: David G. Barrie 2016-04-22 Taking the form of two companion volumes, Police Courts in Nineteenth-Century Scotland represents the first major investigation into the administration, experience, impact and representation of summary justice in Scottish towns, c. 1800 to 1900. Volume 1 explores diverse forms, complementary themes related to judicial practices, relationships, experiences and discourses through the lens of the same subject matter: the police court. Volume 1, the subtitle Magistrates, Mediators and the Masses, provides an institutional, social and cultural history of the development, and role of police courts. It explores their rise, purpose and internal workings, and how justice was administered and experienced by those who attended them in a variety of roles. Special attention is given to examining how courtroom discourse was represented in print culture, the role of the media in providing a discursive commentary on summary justice, and the ways in which magistrates and the police engaged in a law and order dialogue with the press. Throughout, consideration is given to uncovering the relationship between magistrates, the courts, the police and the wider community, and to charting the implications of the rise of summary justice and the ‘police-state’ for the urban space (as evidenced through presence, construction and pattern formation).

Volume 2, with the subtitle Boundaries, Behaviours and Bodies, explores, through themed case studies, how police courts shaped conceptual, spatial, temporal and commercial boundaries by regulating everyday activities, practices and cultures.

A Prophetic Voice—David Smith Cairns (1862-1940)—Marlene Elizabeth Finlayson 2018-12-07 This biography provides an exploration of the formative influences, developments, and impact of the theology of David Smith Cairns, Scottish minister, academic, and writer, during the high point of Britain imperial expansion, and at a time of social tension and political upheaval. It describes Cairns's role and influence on the religious life of his time, and on the religious and philosophical life of Scotland and the wider world. Cairns's life challenges the prevailing assumptions of the day: that science provided the only intellectually legitimate means of exploring the world, and that traditional religious belief was on the way out. Cairns's most important contributions were to Christian apologetics and the defense of Christianity as a "reasonable" faith, and throughout his life he maintained a particular concern for young people, having endured his own crisis of faith when a student in Edinburgh. He enjoyed a decades-long involvement with the World Student Christian Federation, based on a mutually enriching relationship with one of its leading figures, the renowned American evangelist John Ralston Mott.

Civil Society, Associations and Urban Places-Boulton de Vries 2016-12-05 In recent years the concept of 'civil society' has become central to the historian's understanding of class, cultural and political power in the nineteenth-century town and city. Increasingly clubs and voluntary societies have been regarded as important for the development of civil society. For the "middle classes" in particular, membership in civil society organizations often reflects the dynamics of nineteenth-century urban society and politics. Analyses were ideological in purpose and deliberately dichotomous and as such the concept of civil society. Thus competing and segmented associations were not only an indication of pluralism and

Chapter Eight investigates the economic intrusion of private capital into the custodial network and the ideological emphasis on punishment as the main objective in social control. Chapter Seven looks at another aspect of environmental justice. Chapter Six examines how Glasgow has been reconfigured as a classic example of the “neoliberal city.” Chapter Five takes an overview of the origin and rise of neoliberalism in the developed world, arguing that it repudiates rather than continues the thought of Adam Smith and the Scottish Enlightenment. Part One of the present study, of more general interest, of how neoliberalism has affected one of the “stateless nations” of the advanced West. Chapter One takes an overview of the division of labour and its impact on the working class in the Scottish context and chapter two sets the stage for the ensuing analysis.
